

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	Applicant Data Input	Accepts applicant information through a userfriendly web interface.	Implemented	Yes	Successfully accepts user inputs.
2	Data Preprocessing	Cleans missing values, encodes categorical variables, and scales features before prediction.	Implemented	Yes	Improves model performance.
3	Machine Learning Prediction	Predicts whether a credit card application will be Approved or Rejected using the trained model.	Implemented	Yes	Random Forest model integrated successfully.
4	Prediction Result Display	Displays the approval prediction instantly on the web	Implemented	Yes	Provides real-time prediction results.

5	Model Performance Evaluation	Evaluates the trained model using Accuracy, Precision, Recall and F1 Score.	Implemented	Yes	Performance metrics displayed successfully.

Demonstration of Proposed Features

Date	2 July, 2026
Team ID	SWTID-2026-8797
Project Name	Credit Card Approval Prediction
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features proposed during the project planning phase and verifies whether they were successfully implemented and demonstrated in the Credit Card Approval Prediction system.

6	Flask Web Application Deployment	Integrates the trained model into a Flaskbased web application for real-time use.	Implemented	Yes	Successfully demonstrated end-to-end workflow.
---	----------------------------------	---	-------------	-----	--

Feature Implementation Summary

Feature	Value
Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
